

# Monthly Noise Comment & Operations Summary

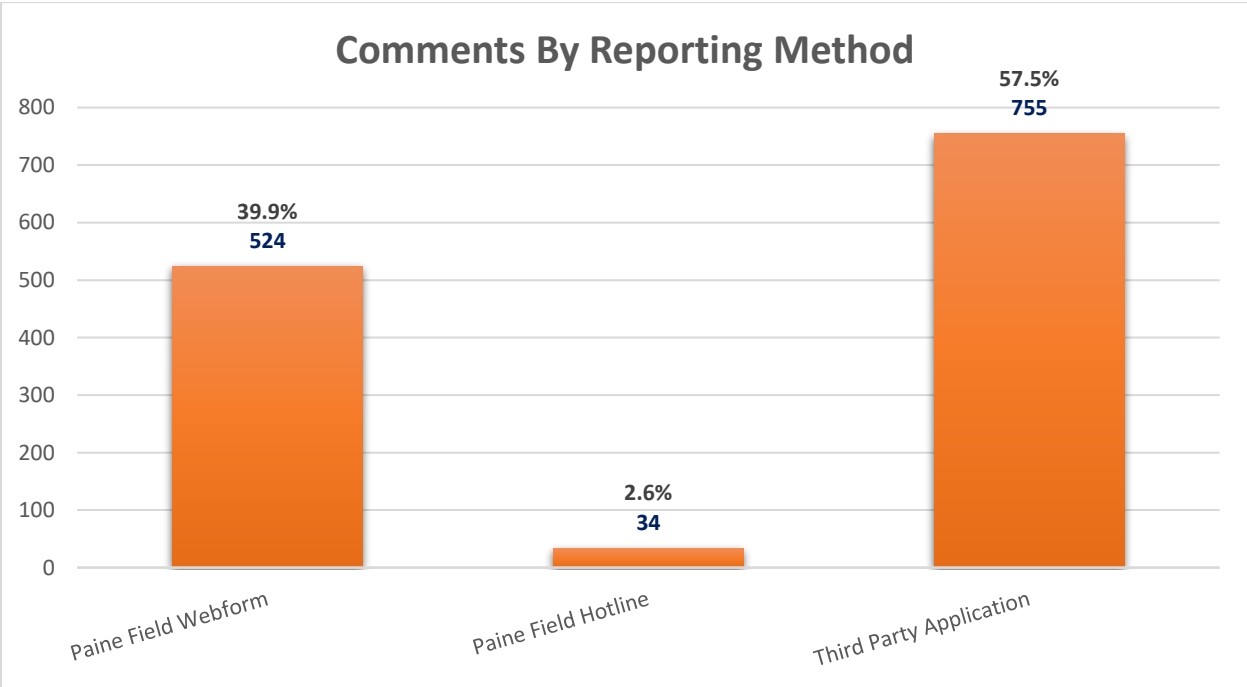

**June  
2020**

Many factors contribute to the number of comments received each month. An unusual flight may get the attention of a large group of people. Re-routed traffic from nearby airports can add more planes to the airspace surrounding Paine Field. Cloud cover can also impact how the sound from an aircraft travels. A handful of people file multiple noise comments, sometimes dozens daily.

Noise comments are received via the Airport's web-based noise comment form, a third-party application, or telephone hotline. Comments are correlated to a specific aircraft by a third-party software program that uses radar data to track aircraft flight routes.
