Noise Complaints Monthly Operations Levels 2005-2008	4

SUMMARY

During March 2008, the Airport Office received 75 noise related calls from individuals in the surrounding communities. All 75 of those calls were complaints regarding flight operations. 25 of the complaints (or 33%) were filed by 2 individuals.

Noise calls are received via telephone hotline (425-353-2110 x1) or through the airport web page noise complaint form (www.paineairport.com/noise/noiseform.html), upon receipt they are investigated. The FAA retains radar data for 3 days before providing it to the airport's AIRSCENE noise monitoring system. Airport staff uses the AIRSCENE data and other sources to help identify which operations generated the complaint. The operator is notified of the complaint and made aware of the airport's noise abatement program. Callers who specifically request to be contacted are called back and all who file complaints are provided a copy of the monthly noise summary which identifies the disposition of the complaint. The monthly noise

summary is normally mailed in the third week of the following month.

Caller Identification Codes are found on page 3 to identify the individuals who made each call. Callers will find their ID number on the mailing label. Some of the aircraft events listed on page 3 are presumed to have originated and/or completed their flight at an airport other than Paine Field.

After the individual complaint listings you will find a graphic representing the 16 noise sub-quadrants located around Paine Field. The graphic also depicts where Paine Field's three noise monitors are located.

In addition to this monthly noise report, you will find a copy of Snohomish County Airport's monthly tenant newsletter, *Paine Field Happenings*. The newsletter is sent to all airport tenants and users and is also found on our website at: www.paineairport.com/happenings/Happenings.html.

RECORDING NOISE COMPLAINTS

Your noise calls are important to us. If there are flight operations taking place which are not ordinary such as very altitude low operations, or repetitive overflights by jets, please do call in. However, if you see an ordinary aircraft taking off or landing, which seem to be abiding by reasonable standards, please be aware that the airport is here to accommodate aircraft. The airport is not collecting or tallying data to be used for any other purpose other than tracking your concern.

In filing your noise complaints, please state your name, address, phone number, and the information pertaining to your concern. For those who have filed a noise complaint before, it is okay to just state your full name. The more complete your information, the better the chance of it being helpful in identifying the aircraft.

To help identify small propeller aircraft, please give a description of the aircraft (i.e. color, high-wing or low-wing,

MARCH 2008 MONTHLY FLIGHT OPERATIONS

During March 2008, the FAA Paine Field Air Traffic Control Tower recorded 10,516 flight operations. This is a 1% decrease in operations from March 2007, which had 10,615 operations.

The four-year average number of flight operations for the month of March is 11,314. Total operations for March 2008 are 7% below the four-year average.

The graph shows operations compared to number of noise complaints for the years 2005, 2006, 2007 and 2008 during the month of March.

March Operations vs. Noise Complaints

NOISE QUADRANTS

The graphic on the right depicts Paine Field's 16 noise quadrants and the locations of the three noise monitors. The blue numbers within each quadrant represent how many calls were made from that quadrant in the month of March. "Unknown" represents complaints where the caller's quadrant was not identified. "Other" represents complaints from outside the four quadrants.

Monthly Operations Levels 2005—2008
